The following was collated from intel sent to our team from Gideon. As always, all intel sent by Gideon is edited by Michael for clarity and for obfuscation purposes (see: Stylometry):

1) Intel Indicates A Major Clandestine Purge Against The Resistance Is Underway

Gideon has received credible intel that a sweeping "final purge" against individuals who would pose a threat to the coming Reset and agenda is underway.

This operation is one of *four* previous operations spanning five decades in which, primarily, America's most educated, dedicated, armed and informed Constitutionalists, patriots and militia leaders have been eliminated, removed and replaced.

The first phase took place from the 1970s and 1980s, which was a "infiltration" operation of patriotic groups and militias. Gideon describes events such as Waco, Ruby Ridge and the assassination of Bill Cooper as the second phase, which involved more direct, violent attempts to remove the patriotic resistance. The third phase took place between 2020 and 2024, eliminating over 5,000 uniquely skilled patriotic individuals worldwide who resisted Covid measures and posed a threat to the cabal's agenda.

The current operation includes participation by the Department of Homeland Security, National Security Agency and FEMA. It is primarily focused on individuals in the United States, but secondary operations have also been launched in Canada, The United Kingdom, The Netherlands, Germany, Australia and New Zealand by their respective intelligence and military apparatuses.

Gideon warns that the individuals - who are all Quarantined status within Obsidian - will be eliminated via the following methods:

1) Direct assassination and targeting, usually via Starlink energy weapons, resulting in heart attacks and strokes. These deaths appear natural. This method is only used against the most dangerous threats to the cabal's agenda, and in some cases, there is spiritual protection in place to protect these individuals from this method.

2) Direct mental manipulation via nano tech and A.I. gangstalking. A targeted individual may experience a remote "activation" of nano tech currently within their bodies, resulting in a re-direction of focus to support, rather than resist, the coming agenda. They may also be monitored and harassed by cabal agents.

3) Threats and intimidation. This method is often used toward militia leaders. The leaders are threatened and often change their approach, tactics and may retire from their activities (this method was used more extensively during prior ops, and extensively in the 1990s).

4) Bribery. Some targeted individuals, based on their Obsidian data profile and other intelligence gathering, may be persuaded to join the cabal's efforts. They may be offered substantial USDR or Sovereign status. This would result in their media platform messaging shifting toward a more positive tone toward the cabal's agenda.

5) A.I. replacement. In some cases, especially with leadership almost entirely promoted online, a patriotic individual may be eliminated and then replaced with an A.I. version of thesmelves. For example, if a patriot has a blog or radio channel promoting anti-cabal messaging, that person may be replaced and an A.I. version will continue to post messaging. That messaging, however, will slowly shift to include cabal-approved messaging, disinformation and misdirection.

Gideon is warning that without these leaders, resistance to Obsidian and the coming Beast system *will be virtually non-existent.* He says the remaining supporters of these leaders and gatekeepers will find themselves without direction or any understanding of what is coming, and likely misled to even support the cabal's agenda.

Gideon also says our team members are likely "safe" from this operation, as it is almost entirely reserved for high-profile resistance leaders with medium to large media platforms. So far, none of our team members fall into this category.

2) "Truther" & Q Anon Gatekeeper Channels Now Aggressively Promote Obsidian's Future Rollout

A careful examination of online groups geared toward exposing the New World Order reveals most of those groups are now "controlled opposition" and run by gatekeepers. This reflects the success of the prior three clandestine purges of patriots in the past.

Major Telegram channels with hundreds of thousands of subscribers, including Julian Assange Wiki with 154,000 subscribers, parrot non-stop Q Anon-style propaganda supporting Donald Trump and Elon Musk, while subtly revealing the deeper agenda and "spinning" it with a positive message. This includes carefully and quietly suggesting a future CBDC crypto brought to the world by Trump & Musk would be a "positive" outcome, possibly backed in some way by gold or precious metals.

More high-profile gatekeepers, such as Alex Jones, are now aggressively pushing and supporting the cabal's agenda somewhat transparently.

This messaging reflects Gideon's warnings in previous Intel Drops that Obsidian may be rolled out and brought to the world via a radical financial change in the United States. Everything involving DOGE and current cabal messaging suggests this is the agenda now, to subvert and deceive the world into accepting a "Golden Age", a new term for the New World Order.

Note: Our next Intel Drop will describe the cabal's plan to bring about the prophecies of "The Book Of Revelation". In fact, a number of cabal gatekeeper channels are now openly discussing Trump as the "Anti-Christ" and Elon Musk as the "False Prophet"

(examples 1, 2, 3, 4). This is *not* being censored by the cabal by design for a specific reason, which Gideon will discuss.

3) Multiple Intel Sources Suggest An Iminent Market Collapse

Intel indicates a market collapse of some kind is being planned that will be followed by a "bail out" offered by Musk & Trump. The market collapse may occur as early as late March, but is expected by mid-Summer.

Gideon is advising all readers prepare their fiat wealth in the following ways:

1) Exit all capital markets, such as stocks and bonds.

2) Liquidate land, real estate, precious metals, 401ks and all non-liquid assets *immediately*.

3) Purchase crypto. Gideon believes in the final capitulation of the markets, Bitcoin may surge. This will be due to the Trump Administration tying capital efforts to stop the market crash to crypto in some way, causing the crypto market to actually *gain* value.

4) The Trump Administration continues to signal positive messaging toward crypto, so it is believed crypto will be involved in the final phase of Obsidian's rollout. This will likely involve Musk possibly issuing tax "rebates" via crypto.

5) Eventually, USDR will be introduced - the cabal's flagship one world digital currency and CBDC - and all current holders of crypto, likely via Trump and Musk's crypto bail-out of the market crash, will *transition* their crypto funds into USDR in some manner, or have it converted. This effort will be capped and limited in some way, and a large-scale purchasing of USDR will *not* be possible (this has been reserved only for the cabal during the prior three years of USDR acquisition).

6) As Musk continually signals, Universal Basic Income is the plan for the future. This will be contained within the Obsidian apparatus. As an aggressive austerity program is now underway, with millions facing job loss with A.I. replacement of jobs, there will be

a "need" for a universal type of income, provided via Obsidian and USDR.

7) New intel indicates that, essentially, an initial phase of USDR's rollout may involve an attempt to *bribe* the world into accepting it, via tax refunds and rebates via the funds "saved" through the DOGE operation. As other governments slowly adopt DOGE's austerity measures, they, too, will follow suit. This will be a "one time" bribery attempt, and once USDR is accepted, limits and penalties for social behavior will apply via Obsidian. ***The individual will then find themselves "trapped" within the Beast system.***

Gideon advises it may be possible to take advantage of a future short-term rise in the crypto market to acquire USDR. This strategy applies only to our team members, whose Sovereign accounts have access to USDR purchases. USDR itself remains *classified* and is *not* available whatsoever on the open market or to the general public.

4) USDR Donations Available To *New* & Existing Team Members

Due to generous donations via some of our team members who have acquired vast sums of USDR over the past few years, we are now able to make the following announcement:

All *new* team members will receive a starting balance of between $15,000 to $85,000 USDR. This will be deposited and provided to your account once you are accepted through our application process.

All of our *existing* team members will receive a direct transfer of between $25,000 and $75,000 USDR to their respective Obsidian Sovereign accounts, to be deposited from the dates of February 25th to March 23rd. This constitutes one of our largest direct infusions to our team member accounts.

These donations are transferred by the whistle blowers within Obsidian using careful obfuscation methods. They are congruent with the activities of other cabal accounts, which make transfers frequently, and are only done under safe conditions whereby all risk mitigation protocols have been met; as such, in some cases, transfers cannot always be made. If this occurs, the transfer will usually be delayed and made at a later point to the team member account. The transfers also serve to meet minimum

account activity requirements and can prevent automated flags, thus preserving and protecting our team accounts.

All donations via our donation pool will prioritize those with low fiat funds and low USDR balances *first*.

If you would like to join our team, we have applications open at this time. We continue to seek patriotic individuals prepared to fight Obsidian and bring down the cabal's apparatus after the Reset takes place.

Gideon believes the Reset itself *cannot be stopped*, largely due to the influence of the cabal's gatekeepers and the fact our Intel Drops and information have been *so aggressively censored* over the past three years. We were *not* able to reach enough people to bring awareness of Obsidian to stop it or change the outcome.

We have a plan to destroy Obsidian *once* it is online by using our Sovereign status and USDR, a process provided to us via the whistle blowers. This plan requires patriots and truth-seekers from around the world to follow our strict security protocols and dedicate themselves to our mission.

This concludes our Intel Bulletin. Our next Intel Drop, with discussions between Bill and Gideon, is expected to be posted next week.
